

Hybrid- Maxilla

Background: BL wanted to improve his esthetics and function. His current dentition was not strong enough to have such money invested, so BL decided to base his teeth on implants for longevity and long-term cost effectiveness.

Before

Temporary bridge on teeth used as transition, while implants are integrating

Final Hybrid (not removable)

Testimonial: "The teeth look great and my jaw feels so much more relaxed. I definitely have less headaches! Thanks for working with my general dentist so closely. Everyone loves the way my teeth look!!!" B.L- Pitman, NJ
