

Implant #8 with Crown

Background: T.L. suffered trauma on his two front when he was a child. He went on and had both teeth crowned several times over the years. But now, his tooth crown #8 had to be redone again due to a fracture. T.L. decided to have an implant placed and then a crown put on the implant instead.

Testimonial: "I was nervous about the dental implant process, but Dr. Kubikian was extremely professional and excellent throughout the entire process. His desire for perfection was noticed and carried out from the beginning to the end, as if it was his own child or relative. I would refer Dr. Kubikian to all my friends and family. Thanks again for an outstanding job." **T.L.- Woolwich, NJ**
